## ACKNOWLEDGEMENT TO THE PRELIMINARY AMENDMENT AND STATUS OF THE CLAIMS

The preliminary amendment filed 12/22/05 is acknowledged, entered and considered. In view of Applicant's request claims 4-7, 10, 11, 15-17, 22, 24, 25, 28 and 29 have been amended and claim 27 has been canceled. Claims 1-26, 28 and 29 are active and pending in the application.

## **ELECTION/RESTRICTION**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 15, 16, 18-25 and 29, drawn to a method of forming a disulfide bond, the method comprising by reacting an organic compound or a method of chemically modifying a protein, peptide or amino acid comprising at least one thiol group by reacting with a compound of formula I and uses and product thereof.

Group II, claim(s) 8-14 and 17, drawn a compound of formula I and a method for preparing a compound of formula I as defined in claim 11 or claim 10, wherein the method comprises by reacting disulfide compound of formula II or formula VIII as claimed in claims 12 and 13, respectively, or wherein the method comprises by reacting

a compound of formula V as claimed in claim 14, or use of the compound as defined in claim 8 for glycosylating a protein or a peptide or amino acid comprising at least one thiol group.

Group III, claim(s) 26, drawn to a protein, peptide or amino acid comprising at least one selenenylsulfide group, wherein the selenenylsulfide group is a group of formula –S-Se-R<sub>2</sub>.

The inventions listed as Groups I and II-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In regard to method of Groups I, the method does not correspond to the same technical features and are not connected in design, operation or effect because it differs in method steps, parameters and reagents used, and as such, the method of Group I is directed to a method for the formation of disulfide bonds by reacting with an organic compound of Group I and does not need the products of Groups II or III. The method of Group I is also directed to a method for the chemical modification of protein, peptide or amino acid by converting thiol group into selenenyl sulfide group for use in the gylcosylation of protein of Group I. Thus, Group I comprises a method and reagents involving thiosulfonates and selenenylsulfates. Therefore, the method of Group I as recited above does not correspond to the same technical features and is not connected in

design, operations or effects because it differ in method steps, parameters and reagents used and functions for the products of Groups II or III.

With respect to the product of Groups II and III, the compound and the protein, peptide or amino acid are related to each other by virtue of reacting disulfide compounds same, but are distinctly different products with different biological, physical and chemical structures and functions. Further, as acknowledged on page 14, lines 13-20 in the instant disclosure, the conversion of the at least one thiol group in the protein, peptide or amino acid to a selenenylsulfide group is highly site-selective and highly advantageous, as it avoids the need of any subsequent deprotection steps to be carried out in the product. Thus, the Groups require different patent and literature search and as such Groups I-III do not share the same technical features, the inventions do not relate to the same inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

## CONCLUSION AND FUTURE CORRESPONDANCE

Claims 1-26, 27 and 28 are subject to restriction and/or election requirement.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abdel A. Mohamed whose telephone number is (571) 272-0955. The examiner can normally be reached on First Friday off.

Application/Control Number: 10/562,599 Page 5
